

ESG AUDIT

HAVE YOU STARTED YOUR ESG JOURNEY?

WHAT IS ESG?

ESG stands for Environmental, Social, and Governance. Analysis and evaluation against these three elements help organisations to consider different areas within their overall sustainability profile.

The Environmental section looks at issues surrounding climate change and actions to address an organisation's environmental responsibility.

The Social aspect is based around the relationships an organisation has with its stakeholders.

Governance criteria focuses on creating a business environment that is fair, transparent, and accountable.
